Summary

Project Manager with over 4 years of experience leading technical and cross-functional teams, delivering digital projects, and improving business processes. Experienced in project planning, business analysis, stakeholder management, and Agile methodologies. I combine an engineering background with practical knowledge of web development, data analysis, and AI tools. Outside of work, I develop my own digital projects, exploring how technology can turn ideas into practical, user-focused solutions.

Work Experience

FedEx Express
Kraków
02.2026 – Present

Project Lead / Solution Design and Implementation Specialist

- Coordinating TNT-to-FedEx migration projects from assessment through implementation.
- Analyzing customer requirements and operational gaps to develop business solutions.
- Collaborating with Operations, IT, Pricing, Customs, Sales, and Customer Experience to align scope and dependencies.
- Monitoring project progress, risks, and deliverables to support timely execution.

Freelancing
Kraków
04.2022 – 02.2026

Project Manager

- Managed digital projects, coordinating client requirements, development tasks, and deliverables.
- Coordinated website development, browser games, and AI-assisted visual content production.
- Managed the implementation of an automated translation solution, eliminating recurring agency fees.
- Applied Agile practices and creative problem-solving to improve processes and project delivery.

Colliers
Kraków
07.2022 – 01.2026

Project Coordinator

- Coordinated project teams, schedules, and deliverables across multiple workstreams.
- Monitored project budgets, scope changes, risks, and requirements.
- Created Excel and Power BI dashboards to track performance and support decisions.
- Managed project documentation, contracts, invoicing, and stakeholder communication.
